

AccuRounds Achieves AS9100 Certification

September 2, 2009: AccuRounds has achieved AS9100B Certification confirming that its quality management system adheres to the stringent standards recognized internationally by the aerospace and defense industry.

“Receiving the AS9100 certification validates our focus on people and process,” says Michael Tamasi, President. “We are very excited to have successfully completed this audit and look forward to partnering with more aerospace and defense contractors. AccuRounds is committed to continuous improvement in order to remain a world class supplier.”

Intertek Testing Services, NA, Inc. granted the certification to AccuRounds after an intensive audit of its Quality Management System. AS9100 is the International Quality Management System Standard for suppliers to Aviation, Space and Defense industries. AS9100 encompasses all the requirements of ISO 9001 along with additional requirements for these industries. AccuRounds has been ISO 9001:2000 certified since 2001.

AccuRounds manufactures custom precision cylindrical components serving a variety of industries. Capabilities include CNC Swiss screw machining, CNC turning and CNC milling. For more information, visit www.accurounds.com.
